

Professional Summary

Analytical and solutions-driven professional with a background in operations research offering foundation in engineering, project management and design. Experienced in developing, documenting, and delivering process innovations. Skilled at transforming company practices into more efficient operations.

Experience

Software Engineer- Qlik Sense
Cognida.ai, Hyderabad, India

June 2024 - Current

- Worked on ETL data flow mappings for MigrateX to support migration of workflows from Alteryx/Informatica to Talend, including logic mapping and metadata documentation.
- Built a Qlik Replicate-based accelerator by defining ingestion workflows and contributing to solution architecture discussions and demos.
- Developed dashboards for Diligent and Phia, including HR dashboards for workforce insights and Tableau dashboards for drafting and plan document tracking, with end-to-end data modelling and joins.
- Translated business requirements into Qlik/Tableau data models and SQL logic, keeping reporting consistency and KPI definitions in mind.
- Worked on optimizing Qlik expressions and load scripts to improve dashboard performance.
- Built basic validation and QA checks to ensure data consistency and reduce reporting issues.

Engineer- Data Analytics
Cloud4C Services Pvt Ltd, Hyderabad, India

January 2023 - May 2024

- Built enterprise BI reporting solutions using Power BI, Oracle Analytics, SQL, and Power Platform to support business-wide analytics and data management.
- Managed and optimized 120+ automated flows and 75+ applications, ensuring operational efficiency, governance alignment, and continuity of reporting.
- Led the Medcan analytics modernization by migrating Tableau dashboards to Power BI and setting up secure enterprise data gateways.
- Developed optimized Power BI data models by converting Tableau logic into efficient DAX, relational models, and reusable reporting layers.
- Created Oracle Analytics dashboards by integrating multiple data sources, defining transformations, and standardizing KPI logic.
- Automated monitoring and validation using Airflow, SharePoint, and Power Platform to improve reporting reliability and reduce manual effort.

Data Analyst
Teleperformance India Private Limited, Hyderabad, India

- Experienced in Cloud-based Machine Learning, research, and developed data pipelines to acquire, clean and process data.

Projects

Client Dashboard Development (Diligent, Phia | Manufacturing, Finance, Healthcare):

Built dashboards across domains with KPIs like schedule adherence, productivity, and performance tracking.
Developed HR dashboards for workforce insights (headcount, gender ratio, project-level metrics).
Worked on Tableau dashboards for drafting and plan document tracking with data modelling and joins

MigrateX – ETL Workflow Migration Accelerator:

Developing a solution to automate ETL workflow migration (Alteryx/Informatica → Talend), including mapping logic, workflow analysis, and metadata alignment.

Qlik Replicate Automation Accelerator:

Led development of an ingestion automation framework and demonstrated solution architecture in client presentations.

Enterprise Dashboard Development (Manufacturing | Finance | Healthcare):

Built analytical dashboards with KPI logic such as schedule adherence and performance metrics to support decision-making.

Power Platform Migration (Retail & Aviation):

Migrated and optimized Power Platform apps and flows to improve automation efficiency and ensure seamless operational transitions.

Medcan – Tableau to Power BI Migration:

Modernized reporting assets by migrating Tableau dashboards to Power BI and configuring secure enterprise data gateways.

Automated Power BI Reporting (Finance):

Built automated Power BI dashboards with trend analytics (weekly, monthly, yearly) to support executive reporting.

Delivery Performance Analytics – Oracle Analytics:

Developed automated Oracle Analytics dashboards to track logistics KPIs and operational performance.

Skills

- Qlik, Power BI, Oracle Analytics, Business Acumen
- Microsoft Power Platform
- Azure Cloud
- Data Storytelling, EDA, ETL
- SQL, Python Programming for Data Analysis

Education

Master of Science (M.S.): Operations Research - Osmania University, Hyderabad, India	March 2023
Bachelor of Science (B.S.): Statistics - Osmania University, Hyderabad, India	March 2021

Certification

• Talent Solutions Architect	November 2024
• Certified Scrum Product Owner (CSPO)	May 2025
• Oracle- Enterprise Analytics Professional 1Z0-1041-24	March 2024
• Power App Maker Associate- PL 100	February 2024
• Qlik Sense Business Analyst	May 2025
• Databricks Certified Machine Learning Professional	April 2026
